

Project Executable Files

Date	01 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Project Executable Files

This section contains all executable and deployable files required for the Credit Card Approval Prediction System. All project files are organized properly to enable the evaluator to run or deploy the application using the provided source code, setup instructions, and dependency files.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
CredAI/
├── README.md
├── app.py
├── requirements.txt
├── data/
│   ├── application_record.csv
│   └── credit_record.csv
├── model/
│   ├── credit_card_approval_model.pkl
│   ├── feature_order.pkl
│   ├── label_encoders.pkl
│   └── scaler.pkl
├── notebook/
│   └── Credit_Card_Approval_Prediction.ipynb
├── static/
│   ├── css/
│   │   └── style.css
│   └── js/
│       └── mains.js
└── templates/
    ├── _footer.html
    ├── _navbar.html
    ├── features.html
    ├── History.html
    ├── how_it_works.html
    ├── index.html
    ├── Ml_models.html
    ├── prediction.html
    └── result.html
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://credit-card-approval-prediction-ba1f.onrender.com
Login Credentials (Demo)	Not Required / Demo Access
Platform / Hosting Provider	Render / Local Flask Server
Repository Link	https://github.com/JohnsonpaulG/Credit-Card-Approval-Prediction
Demo Video Link	https://drive.google.com/file/d/1LW5DxaJb1YKuypiemjEGQyZxnOPrSySV/view?usp=drive_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Download or clone the project repository.
2. Install all required dependencies using **pip install -r requirements.txt**.
3. Ensure that all trained Machine Learning model files are available in the **model** folder.
4. Run the application using **python app.py**.
5. Open the displayed localhost URL (e.g., <http://127.0.0.1:5000>) in a web browser.
6. Enter the applicant's personal and financial details in the prediction form.
7. Click **Predict** to view the credit card approval prediction result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality of input data.	Validate user inputs before prediction.
2	Model performance may decrease for unseen or highly imbalanced data.	Periodically retrain the model with updated datasets.
3	Advanced features such as user authentication and database integration are not implemented.	Planned as future enhancements.
