Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings throughout the credit card application process. This helps identify pain points, understand user expectations, define process ownership, and discover opportunities to improve the overall experience by providing a faster, more accurate, and transparent credit card approval system

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Opens the CredAI website. • Reads the project overview. • Clicks Start Prediction.	• Enters applicant details in the prediction form. • Reviews the entered information. • Clicks Predict.	• Views the prediction result. • Checks the approval status and confidence score. • Returns to Home or predicts again.
Touchpoint <i>What part of the service do they interact with?</i>	• Home Page • Navigation Menu • Start Prediction Button	• Prediction Module • Machine Learning Model • Processing Screen	• I hope I entered the correct information. • I want an accurate prediction. • Let me submit the form.

Customer Thought <i>What is the customer thinking?</i>	Can this system predict my credit card eligibility? • Is the application easy to use? • I want a quick prediction.	• I hope I entered the correct information. • I want an accurate prediction. • Let me submit the form.	• What is my result? • How confident is the prediction? • Can I improve my eligibility if rejected?
---	--	--	---

Customer Feeling <i>What is the customer feeling?</i>	Curious • Interested • Hopeful	Focused • Slightly anxious • Expecting the result	Happy if approved. • Curious about the confidence score. • Motivated to improve if rejected.
Process Ownership <i>Who is in the lead on this?</i>	Frontend Interface • Navigation Components • Flask Routing	Form Validation • Flask Backend • Machine Learning Prediction Model	Prediction Model • Result Rendering • User Navigation
Opportunities <i>How can we improve this stage?</i>	• Provide a short project guide. • Improve onboarding. • Add FAQs.	• Add real-time field validation. • Show a loading indicator while predicting. • Provide input guidance.	• Display personalized recommendations. • Explain the prediction in simple language. • Allow users to download or save the result.
