

Code-Layout, Readability and Reusability

Date	29 June 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction System
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing and indentation used throughout the code	Yes	Improves readability
2	Proper File Structure	Files and folders are logically organized	Yes	Separate frontend, backend, and ML files
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Easy to understand
4	Function / Method Names	Functions are descriptively named	Yes	Indicates functionality clearly
5	Code Comments	Inline and block comments explain logic	Partial	Comments added for major sections
6	Modular Design	Code is split into reusable functions/modules	Yes	Backend and ML modules separated
7	No Redundant Code	Duplicate or unused code is removed	Yes	Code optimized
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Basic validation implemented

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Prediction Form	HTML, CSS, JavaScript	User Interface	High
2	Flask Routes	Python, Flask	Backend Request Handling	High
3	Data Preprocessing Module	Python, Pandas	Before Prediction	High
4	Machine Learning Prediction Module	Scikit-learn	Credit Card Approval Prediction	High
5	Result Display Module	HTML, CSS	Prediction Result Page	Medium

Overall Code Quality Assessment:

S.No	Component / Module Name	Language / Technology
1	Data Preprocessing Module	Python (Pandas)
2	Machine Learning Prediction Engine	Python (Scikit-learn)
3	Trained Model Loader	Python (Joblib)
4	Flask Web Application	Python (Flask)
5	User Interface Module	HTML, CSS, JavaScript
